

Max Woolf

PROFESSIONAL EXPERIENCE

BuzzFeed — Data Scientist — San Francisco, CA

Aug 2017 —
Aug 2026

- Facilitated research and development of AI-generated content initiatives such as:
 - Onboarded BuzzFeed engineers and writers for ChatGPT API usage, including prompt engineering for accurate and optimized text generation.
 - Led engineering and QA on an AI chatbot which uses retrieval-augmented generation to return highly-relevant BuzzFeed food recipes for user queries.
 - Built a self-serve pipeline using third-party APIs for fine-tuning Stable Diffusion XL for unique creative articles, such as generating “AI Selfies.”
 - Led development on embeddings pipeline to align all forms of BuzzFeed content for personalization, recommendations, and clustering related trends.
 - Wrote detailed guides for best-utilizing and prompting LLMs for the company, including constraint optimization and returning results as structured output.
 - Implemented a bespoke content highly-quality content tagging pipeline using Claude to replace a legacy NLP API, saving \$thousands per month.
- Architected, trained, and iterated a custom AI model to generate high-quality embedding representations of BuzzFeed content, resulting in significantly improved related content performance.
- Implemented ETL and machine learning pipelines to train Keras models for recommending optimal evergreen posts and deploying the models to production.
- Created and managed automation heuristics and performance for BuzzFeed content on social media, saving time for BuzzFeed’s social curators.
- Performed post-level competitor analyses on Facebook data to identify site-wide algorithmic shifts and offered suggestions to utilize the trend changes.

Apple Inc. — Software QA Engineer (Apps) — Cupertino, CA

Jul 2012 —
Apr 2017

- Tested iWork for iCloud from alpha, to public release, to post-release support.
- Created and executed robust and technical test plans for project milestones.

PERSONAL PORTFOLIO

GitHub (<https://github.com/minimaxir>)

- Developed and fully open-sourced many popular machine learning/AI tools and Jupyter Notebooks, many with thousands of community Stars.

Blog (<https://minimaxir.com>)

- Wrote many technical blog posts about cutting-edge data science and AI best practices.
 - [An AI agent coding skeptic tries AI agent coding, in excessive detail](#)
 - [Nano Banana Pro is the best AI image generator, with caveats](#)

EDUCATION

Carnegie Mellon University — Bachelor of Science — Pittsburgh, PA

Sep 2008 —
May 2012

- GPA: 3.78 / 4.00 (Graduated with University Honors)
- Major/Minor: Computing and Information Technology / Statistics

RELEVANT SKILLS / PROGRAMMING LANGUAGES

R/tidyverse/ggplot2, Python/pandas, SQL/PostgreSQL/BigQuery, TensorFlow/Keras/PyTorch, Docker, scikit-learn, Google Cloud Platform, NLP, A/B Testing, Hugging Face Transformers, Claude Code/Codex
